

iNRCORE

Design with Confidence

We understand the challenges you face when developing programs with long life-cycles.

Policy of Non-Obsolescence

It is the policy of our business to **never obsolete products**, as long as materials and specific tooling remain available.

The Entire Program

We value the trust you place in iNRCORE and we make every effort to provide lifetime support of our products.

About iNRCORE

"iNRCORE designs and manufactures magnetic components that transmit high-speed, mission-critical data and power in the harshest operating conditions. Our solutions have operated on the frontlines of defense to the frontiers of space exploration. For over 70 years, iNRCORE has deployed reliable and intelligent solutions to power next-generation systems. Our expert engineering teams and award-winning quality and service exceed our customer demanding expectations. Whether we are working to assemble a component to meet your custom design or screening your products to qualify for a critical mission, iNRCORE's solutions are rugged to the core."
